2. PERRY SMITH ABCO - WOOD-FIRED BOILER, BOILER NO. 1**Summary Description**

The following is a narrative description of boiler No. 1 regulated in this Tier I operating permit. This description is for informational purposes only.

Boiler No. 1 was manufactured in 1976, and was first permitted for operation at Brand S Corp. on February 1, 1978 (Air Pollution Source Permit No. 0240-0027). Riley Creek Lumber purchased Brand S Corp. some time after 1979 and subsequently permitted the boiler on March 1, 1984 (Air Pollution Source Permit No. 0240-0027). The boiler's rated heat capacity is 70.23 MMBtu/hr, and it is fired on wood fuel exclusively. RAIL CAR TARGET BOX, PLANER SHAVINGS CYCLONE BAGHOUSE, AND OLIVINE BURNER****Summary Description**

The following is a narrative description of the sources regulated in this section of the Tier I operating permit. This description is for informational purposes only.

The rail car target box receives wood chips pneumatically from the sawmill and planer mill, and is classified as a point source due to the presence of an air-displacement stack. The planer shavings cyclone baghouse is required by the consent order dated July 10, 2001, as part of a Department-approved supplemental environmental project. The Olivine burner is no longer in use as a wood waste incinerator at Riley Creek; however, it is still subject to regulation until such time as it is dismantled and moved off-site.

Table 4.1 below describes the devices used in controlling emissions from the sources regulated in this permit.
